A: The MFD2 included in the TPMS 2011 unit is the same one as the one in the 2012 unit: You should also check the firmware of the 2010 MFD2 that came with your 2010 TSI: From the thread on that site: Download the following file for the stock 2010 MFD2 navigation unit: Save it to a FAT32 formatted microSD card. I believe the 2010 MFD2 had the same version number as the one that came with your TSI, so you should be able to use the same map. EDIT: Some other people are reporting success with getting the 2010 MFD2 to work with the 2012 MFD2 navigation systems: We're excited to announce that Axis Bank has released Axis Bank's mobile app for iOS devices. The Axis Bank Mobile App gives you a full-fledged banking solution on the go. You can access all of your banking products such as Cash with Axis Debit Cards and Debit Cards. Explore your account – find account

numbers, click on Accounts and choose the account that you want to see. You can now do all your account transactions via this application. You can view and transfer funds to other accounts, issue and return cash with your debit card, deposit/withdraw money from your ATM, and other banking features. Monitor account balances – You can track your account balances and make changes to your transactions via the application. You can also view transactions made for your cash cards. Visit your bank branch – 4bc0debe42
